DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-19 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The phospholipid derivative of formula 1 contains the following phrase: k_1 , k_2 , and k_3 represent numbers satisfying the following conditions: $1 \leq k_1 \leq (k+2)/2$, $0 \leq k_2$, and $k_1 + k_2 + k_3 = k + 2$. While applicant has supplied definitions for k_1 & k_2 , there is no definition given for k_3 . There is no way to calculate a plausible value for k_3 when plugging in numbers for k_1 & k_2 . If one arranges the equation to give k_3 and define k_1 to equal 1, k_2 to equal zero and k to equal 7 then k_3 would be defined as the following: $k_3 = (k+2) - k_1 - k_2 \Rightarrow k_3 = (7+2) - 1 - 0 \Rightarrow k_3 = 9$.

So according to this scenario, $k_3 = 9$ and there should be 9 additional "OH" groups attached to the hexaglycerol which contains 3 "OH" groups totaling. This assumption is

based on applicants' explanation on page 8 wherein it is stated, "Symbol "k3" is the number of the hydroxyl groups that bond to the polyglycerin residue...." These being the case, then the compounds on pages 29-33 do not depict additional "OH" groups.

This also pertains to the compounds in claims 14 & 17.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 4 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 recites the limitation "wherein k1, k2, and k3 satisfy $8 \leq k1 + k2 + k3 \leq 52$ " in lines 2-3. There is insufficient antecedent basis for this limitation in the claim.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah D. Carr whose telephone number is 571-272-0637.
